

EAA Seminar
**Validation of Technical Provisions under SII –
An Actuarial Perspective**

9/10 March 2017 | Madrid, Spain

Organised by the EAA - European Actuarial Academy GmbH in cooperation with the Instituto de Actuarios Españoles.

Introduction

Solvency II has come into force with the beginning of 2016. Thus all requirements of this new regulatory framework have to be implemented step by step by primary and reinsurance companies within the European Union. For the majority of these requirements various guidelines are published. Nevertheless, there are many uncertainties how to interpret the content of these guidelines, especially for smaller and mid-size companies, with regard to materiality and proportionality aspects.

Beneath calculation and reporting issues, Solvency II requires that a validation of the Technical Provision has to be performed and adequately documented by each legal entity (cf. Art. 264, 265 Delegated Acts). This validation activity has a linkage to pillar I, pillar II and also pillar III of the new solvency system. The seminar will provide a general overview on validation aspects. Starting with a summary of the existing regulatory framework, we will provide you helpful interpretations on the first day as well as several practical examples on how to manage the validation tasks on the second day.

All sessions will be a combination of lectures and interactive discussions.

Participants

The seminar is open to all interested persons, such as actuaries, risk and capital managers, controllers, supervisors and auditors from all types of insurance companies. Participants should have basic understanding of Solvency II. This seminar will be helpful for professionals working in life, health as well as in non-life insurance business.

During this seminar, you will not need a laptop.

Purpose and Nature

The aim of this seminar is to provide participants with a deeper understanding of validation issues, which will be useful for the daily business in particular for those who are involved or responsible for validation activities. How to embed the validation process into various other related processes (model change, reporting etc.) and how to perform the validation tasks in an efficient manner (incl. documentation) will be central topics of this seminar.

Examples how to solve possible conflicts of interests will be given for situations where validation, modelling and calculation activities lead to such conflicts. After this seminar, participants will have a clear understanding of validation requirements and of how to fulfill them in an efficient way.

Language

The language of the seminar will be English.

Lecturers

Dr Dieter Köhnlein

Dieter Köhnlein, Senior Actuarial Consultant at Roever Broenner Susat Mazars in Germany and Managing Director of Solvency Fabrik, Germany. He advises insurance and reinsurance companies in Solvency II implementation within all three pillars. Prior to his consulting work, Dieter has been heading an actuarial department of a primary insurance company. He has been involved in S II related stakeholder consultation procedures for more than ten years now as part of his work for the actuarial profession. Dieter is member of the board of Deutsche Aktuarvereinigung, member of the Insurance Regulation Committee of the IAA and of the Freedoms, Standards and Professionalism Committee of the AAE.

Dr Nader Razouk

Nader Razouk, project manager at Allianz Deutschland AG. In his role, he works on the implementation of Solvency II requirements in the actuarial department of non-life, life and health insurers. Prior to his current position Nader Razouk was a Manager at Ernst & Young in the actuarial service practice. The majority of his projects were in the area of Solvency II in particular around Pillar 1 (Standard - and Internal Models), Pillar 2 (e.g. Actuarial Function and ORSA implementation) and in particular the IMAP implementation. He supported a major international insurance group in its implementation of the Actuarial Function and Internal

Model Approval Process (IMAP). Since 2010, Nader regularly lectures on seminars of the German and European Actuarial Academy (DAA / EAA).

Dr Ulrich Stellmann

Ulrich Stellmann, manager at ERGO Insurance AG, Germany. In his role, he works on actuarial governance within the group and on the implementation of Solvency II requirements regarding the actuarial function (life, health and non-life) in the integrated risk management department. Prior to his current position Ulrich Stellmann worked in several fields of risk management and actuarial practice, e.g. appointed actuary positions in health insurance or product development in life insurance. In addition to some engagement in the German association of actuaries (DAV), Ulrich Stellmann is a vice chair of the IAA health committee and a member of the IAA health section.
